

Freeware Database for follow-up of HIV-patients and programs

In

Infectious Diseases Department of Sihanouk Hospital Center of HOPE

Presented by : Mr. Len Aynar

Issue

- **Scaling-up clinical HIV care and treatment services**
- **This requires monitoring of individual patients, cohorts and evaluation programs**
- **This is a complex task**
- **Successfully performed: using an electronic database**

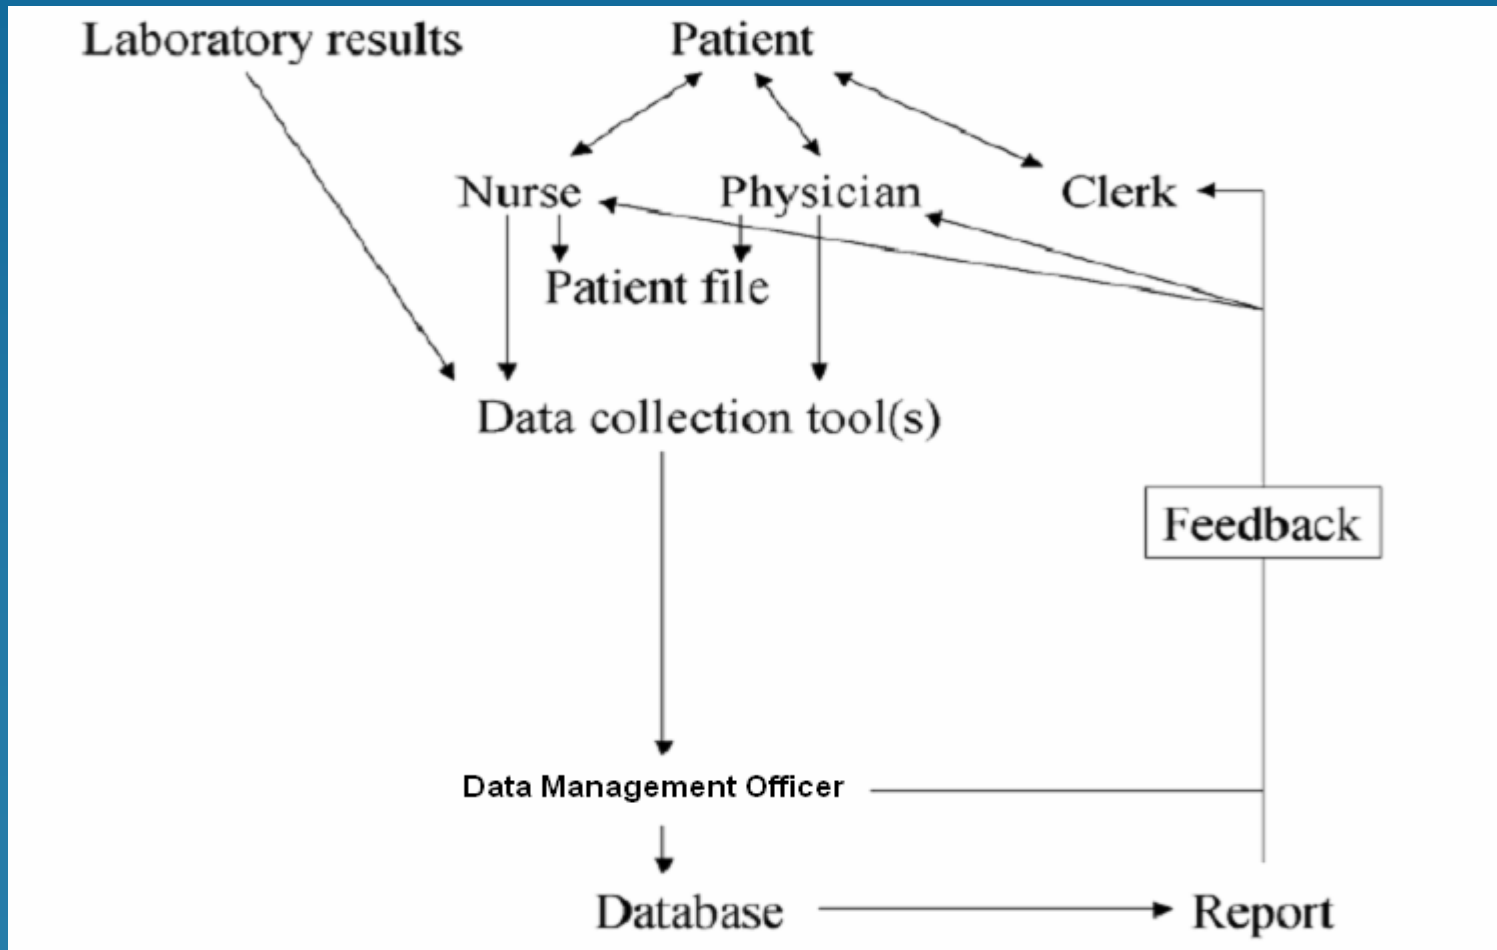

Patient monitoring

2 main functions:

- **Enables effective clinical management of patients**
- **Patient monitoring data are used for program monitoring and management**

DESCRIPTION

Data-collection in SHCH

DESCRIPTION

Database

- MS Access2003
- C:\ArtJournal – v2
- User manual

DESCRIPTION

In the database

tblPATIENT : Table			
	Field Name	Data Type	
PK	ID	Number	
	Initials	Text	
	Gender	Text	
	Birthday	Date/Time	
	Enrol_d	Date/Time	date enrolment in cohort
	drop_rs	Text	reason drop-out
	drop_d	Date/Time	date drop-out
	drop_en_d	Date/Time	date drop-out decided
	Consent	Text	Informed consent granted
	DMO	Text	

tblLAB_CD4 : Table			
	Field Name	Data Type	
PK	CD4_ID	AutoNumber	
	ID	Number	
	CD4_d	Date/Time	date test
	CD4_v	Number	value of CD4
	DMO	Text	

tblLAB : Table			
	Field Name	Data Type	
PK	LAB_ID	AutoNumber	
	ID	Number	
	LAB	Text	lab test
	LAB_d	Date/Time	date test
	LAB_v	Number	value of test result
	LAB_t	Text	text result
	DMO	Text	

tblCLM : Table			
	Field Name	Data Type	
PK	CLM_ID	AutoNumber	
	ID	Number	
	CLM	Text	clinical measure
	CLM_d	Date/Time	date clinical measure
	CLM_v	Number	numerical result
	CLM_t	Text	text result
	DMO	Text	

tblDIS : Table			
	Field Name	Data Type	
PK	DIS_ID	AutoNumber	
	ID	Number	
	DIS_start	Date/Time	
	DIS	Text	
	DIS_stop	Date/Time	
	DMO	Text	

tblVIS : Table			
	Field Name	Data Type	
PK	VIS_ID	AutoNumber

Program report

Report HIV Treatment program

Generated by ArtJournal database

I. Overview patient population on : 31/08/2006

A. Total number of patients in active follow-up*: 1538

* Active follow-up means a patient had at least 1 visit in the last 6 months and is not known to be dead, transferred or lost-to-follow-up.

B. Patient characteristics:

Gender:

Gender	Number	%
F	835	54.3
M	703	45.7
Total	1538	

Age:

Average age: 36 years (Range: 0 -80)

C. Immunological data:

Number of patients with a CD4 count determined over the past 6 months: 1035.
(=67.3% of the active patient population)

Number of patients with a TLC determined over the past 6 months: 1187.
(=77.2% of the active patient population)

Last CD4 count in the active patient population:

Overall:			Not on ART:			On ART:		
CD4 level	Number	%	CD4 level	Number	%	CD4 level	Number	%
<200	411	26.7	<200	53	10.3	<200	358	35.0

Cryptococcal meningitis	1	1.5
Chronic vulvovagin. Cand.	1	1.5
HSV persistent or recurrent	1	1.5

Donor Report

Sihanouk Hospital Center of HOPE

GF1 activity report

Reporting on cohort and opportunistic infections is only correct for GF1, GF2, GF4, not for Hospital+ITM

Some drop-out patients are only identified six months after their last contacts, so only reports made more than six months after the end of the reporting period are complete and final.

Reporting period

Reporting period: from **01/08/2006**
till **31/08/2006**

Cohort

Total patients	GF1	New patients	GF1
	419		37

Reason of dropout	Number of patients
Deceased	1

Number of patients ever on ART in this period	331
Number of patients started	87
Number of patients stopped	1
Number of patients on ART at the end of this period	330

Regimen	Number of patients
efavirenz/lamivudine/abacavir	3
efavirenz/stavudine/lamivudine	46
efavirenz/zidovudine/lamivudine	37
indinavir/ritonavir/lamivudine/abacavir	1
indinavir/ritonavir/stavudine/didanosine	2
indinavir/ritonavir/zidovudine/lamivudine	1
indinavir/stavudine/lamivudine	1
lopinavir/ritonavir/didanosine/abacavir	4
lopinavir/ritonavir/lamivudine/abacavir	1
lopinavir/ritonavir/lamivudine/tenofovir	2
lopinavir/ritonavir/stavudine/didanosine	1
lopinavir/ritonavir/stavudine/lamivudine	2
lopinavir/ritonavir/zidovudine/lamivudine	3

Monitoring

- **Data Monitoring**

Lessons learned

- An appropriate database greatly facilitates follow-up of individual patients and gives a better overview of program performance and outcomes
- The database facilitates the reporting required by different donors

Recommendation

- <http://telemedicine.itg.be/telemedicine/site/Default.asp>
- Computer requirements: Window XP and MS Access 2003

Thanks
