CQI for CoC

What is CQI?

- C = Continuous
- Q= Quality
- I= Improvement

Continuous Quality Improvement

What is CoC?

- C = Continuum
- o= of
- C= Care

Continuum of Care

Background

- Before 2003; a few percentage of PLHA received ART mostly from NGOs, there was no National Guideline for ART yet;
- This becomes a concern. In 2003, MoH establish CoC to response to the need for care and treatment for people infected with HIV/AIDS;
- Five years later meaning in 2008; it is estimated that about 90% AIDS patients already received ART;
- What is the quality services provided to patients?
- HIV CQI would play important role in improving the quality services of HIV care

Background (cont.)

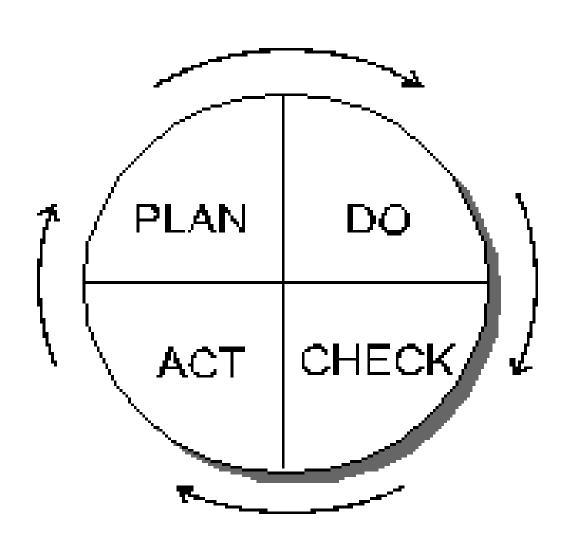

- This becomes another concern about the quality services provided to patients;
- In 2008, NCHADS in collaboration with UNAIDS, WHO, USCDC, and other concerned organizations to develop Standard Operation Procedure for CQI for Continuum of Care for HIV/AIDS in Cambodia in the hope that CQI would play important role in improving the quality services of HIV/AIDS care

Concept of CQI

Deming and his colleague, Shewhart,
 promoted the PDCA cycle – mean that

<u>P</u>lan, <u>D</u>o, <u>C</u>heck and <u>A</u>ct.

The PDCA Cycle

Overall objective

 To improve the quality of care and treatment services provided to PLHA in Cambodia

Specific objectives

- To create a culture of continuous quality improvement among CoC team
- To improve communication between health care providers, data management team, community support teams and other related organizations in the CoC
- Capacity building for CoC team to manage CQI

Indicators of CQI for CoC

 Mortality indicators: consists of 3 key indicators;

 Quality of service indicators: consists of 5 key indicators;

Case-finding and prevention indicators: consists of 4 indicators

Mortality indicators

Percentage of patients under ART who died;

 Percentage of patients under ART who were lost to follow-up;

 Percentage of patients under OI who died or were lost to follow-up

Quality of service indicators

Percentage of patients on ART who kept all appointments in the last quarter (post-ART);

 Percentage of patients with CD4<350 (CD4<250 before April 2010) or WHO stage4 who start ART within 60 days (pre-ART);

 Percentage of patients with CD4 counts less than 200 and 100 receiving prophylaxis with CXT and fluconazole respectively

Quality of service indicators (cont.)

 TB screening: Percentage of patients newly registered at the OI/ART site who were screened for TB (pre-ART);

 Percentage of patients on ART who are still on first line regimens after 12 or 24 months (post-ART)

Case-finding and prevention indicators

 Percentage of new OI patients with an initial CD4 count of >350 (CD4<250 before April 2010);

 Percentage of new TB patients who receive HIV testing and counseling (TB)

Case-finding and prevention indicators (cont.)

 Percentage of ANC1 patients who received HIV testing and counseling;

 Percentage of known HIV+ pregnant women who received prophylaxis (PMTCT).

FINDINGS

Percentage of adult patients under ART who died by quarter in Maung Russey RH, BTB

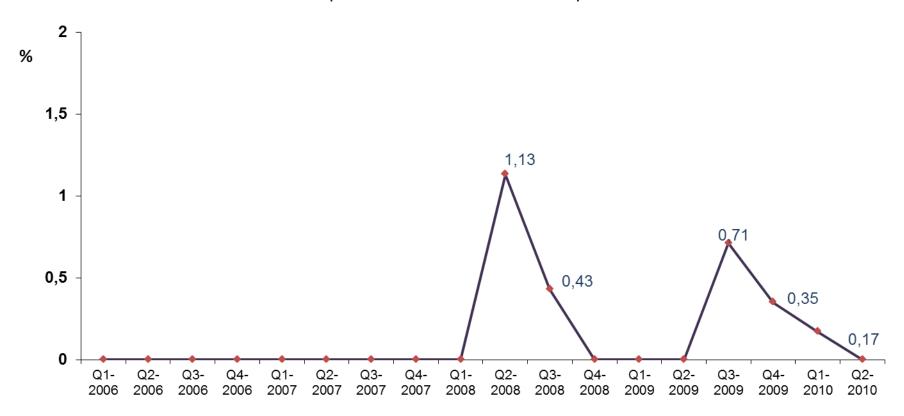

<u>Numerator</u>: Total number of patients known to have died during the quarter. <u>Denominator</u>: Total number of active ART patients + total number of ART dead in the quarter

Percentage of Patients whose CD4<200 and received Cotrimoxazole by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Number of OI/ART patients with most recent CD4 <200 and who receive a new or ongoing prescription for cotrimoxazole at the appointment following the date of the CD4 test (within the quarter)

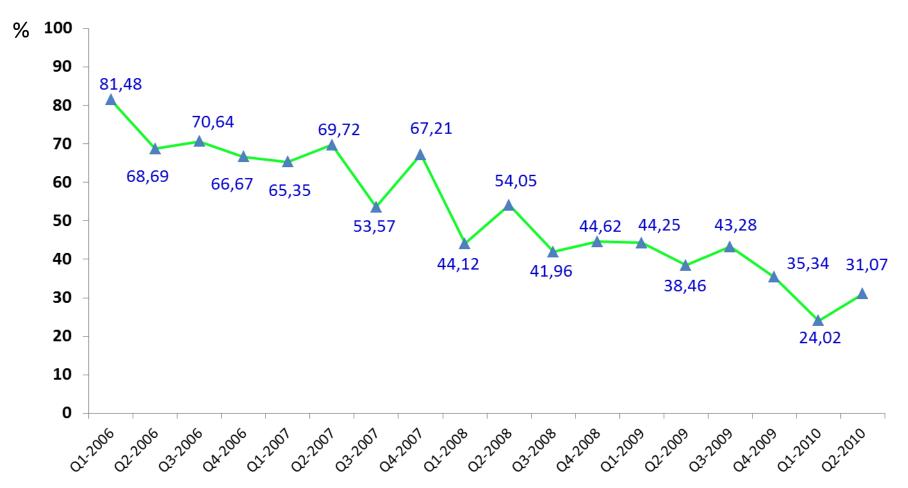

<u>Denominator</u>: All OI/ART patients with CD4 cell counts < 200 (within quarter)

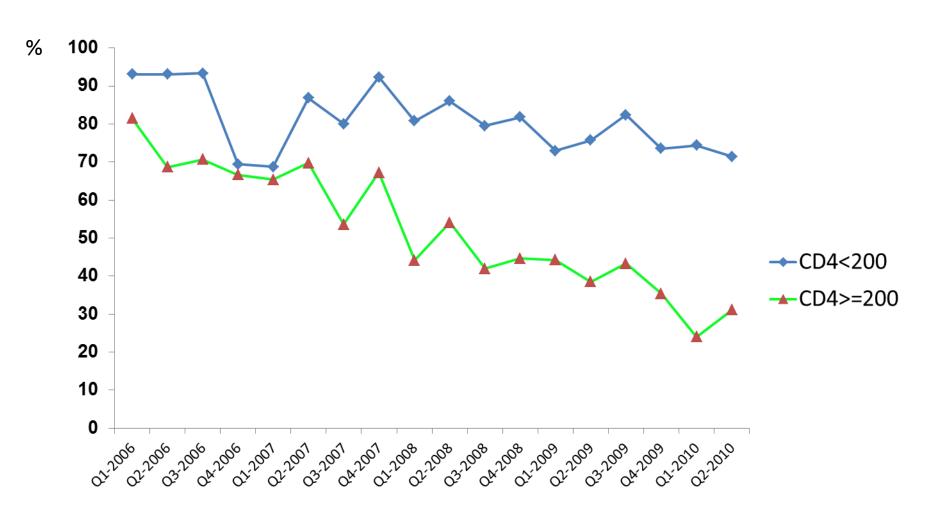

Percentage of Patients whose CD4>=200 and received Cotrimoxazole by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Number of OI/ART patients with most recent CD4 >=200 and who receive a new or ongoing prescription for cotrimoxazole at the appointment following the date of the CD4 test (within the quarter)

<u>Denominator:</u> All OI/ART patients with CD4 >= 200 (within quarter)

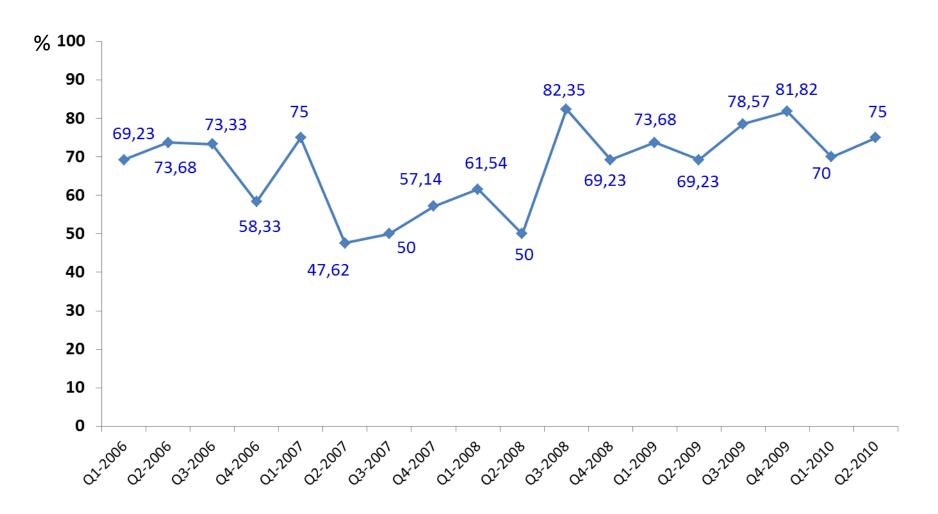

Percentage of Patients whose CD4<200 and CD4>=200 received Cotrimoxazole by quarter in Maung Russey RH, BTB

Percentage of Patients whose CD4<100 and received Fluconazole by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Number of OI/ART patients with most recent CD4 <100 and who receive a new or ongoing prescription for Fluconazole at the appointment following the date of the CD4 test (within the quarter)

Denominator: All OI/ART patients with CD4 < 100 (within quarter)

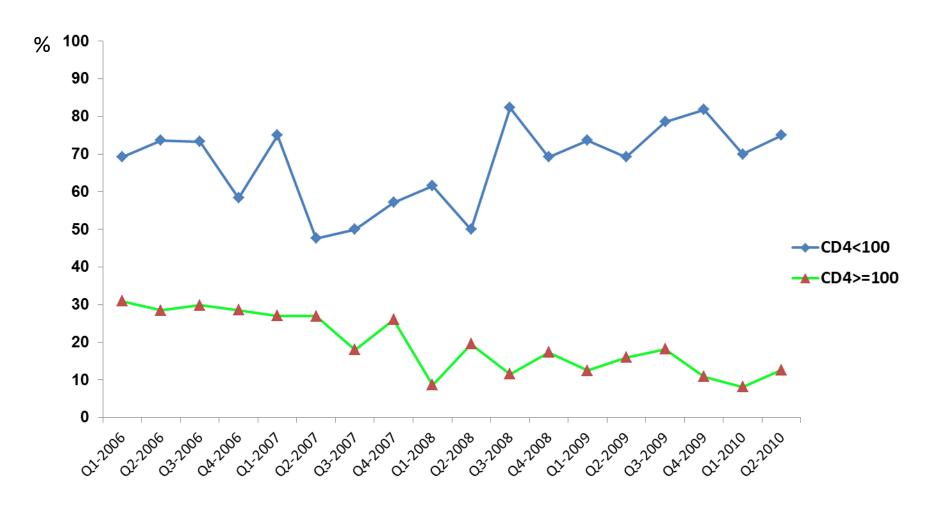

Percentage of Patients whose CD4>=100 and received Fluconazole by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Number of OI/ART patients with most recent CD4 levels of >=100 and who receive a new or ongoing prescription for Fluconazole at the appointment following the date of the CD4 test (within the quarter)

Denominator: All OI/ART patients with CD4 cell counts >= 100 (within quarter)

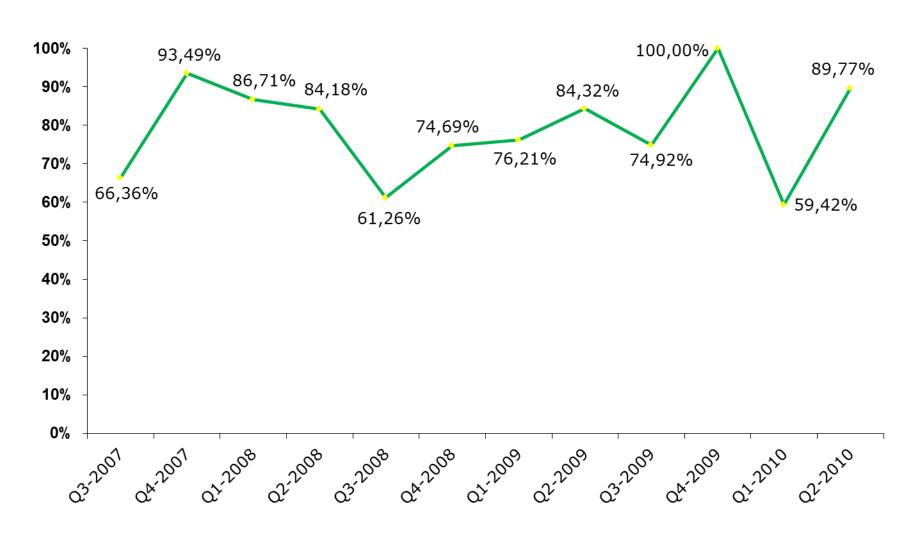

Percentage of Patients whose CD4<100 and CD4>=100 received Fluconazole by quarter in Muang Russey RH, BTB

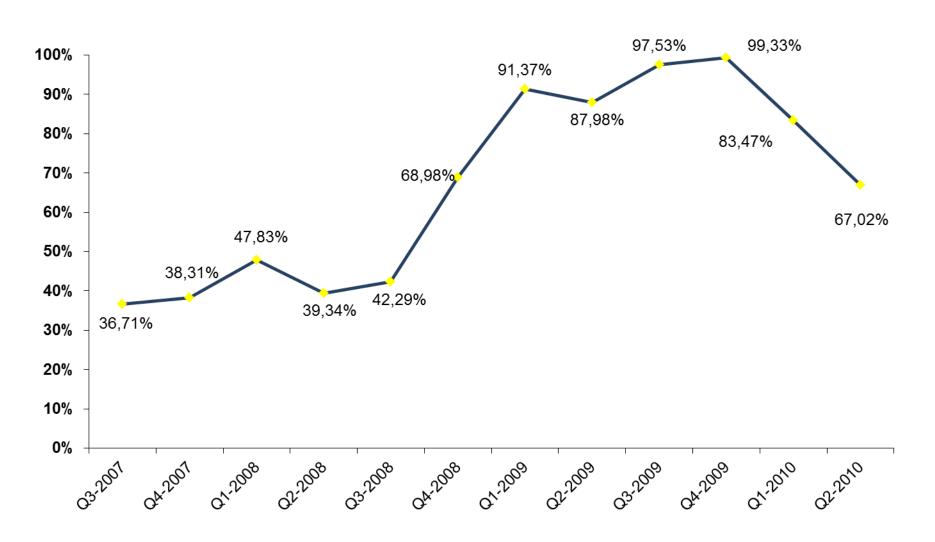

Percentage of HIV Testing among ANC 1 by Quarter in Maung Russey RH, BTB

<u>Numerator</u> = number of ANC1 post tested counseled <u>Denominator</u> = total number of ANC first visit

Percentage of delivered women with known HIV status at by Quarter in Maung Russey RH, BTB

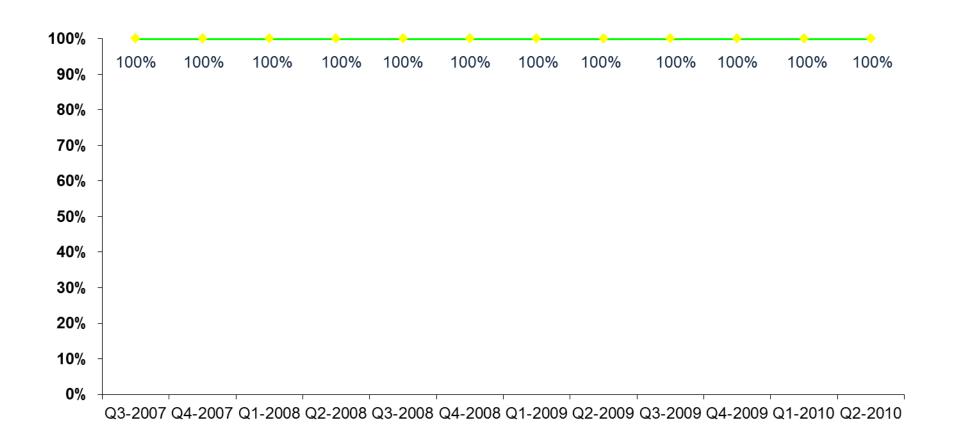

<u>Numerator</u> = Total Number of delivered Women with known HIV status <u>Denominator</u> = Total Number of delivered Women

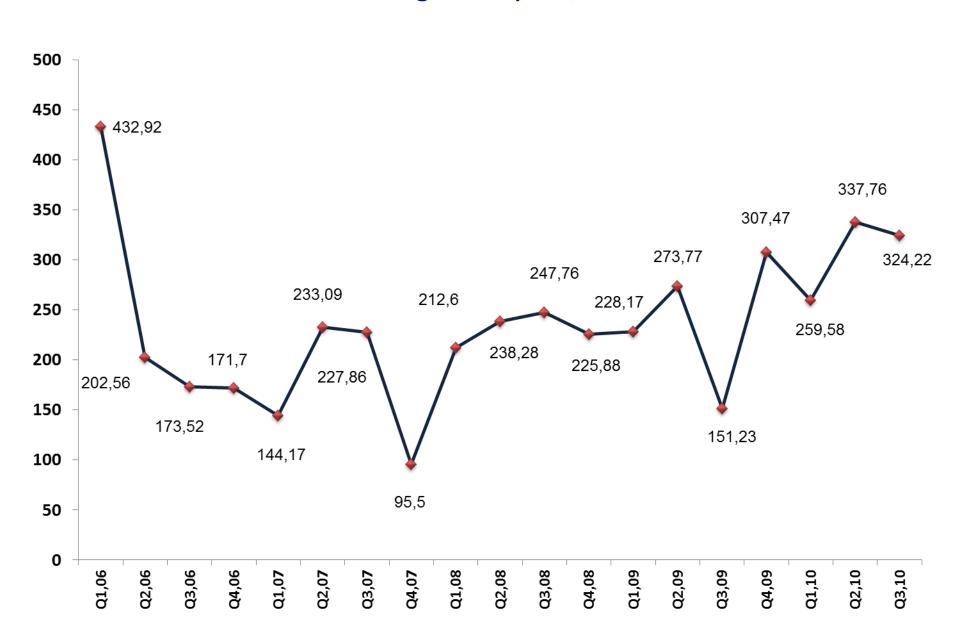

Percentage of HIV + Women who received any prophylaxis or HAART during Labor by Quarter in Maung Russey RH, BTB

<u>Numerator</u> = Total Number of delivered women who received any prophylaxis or HAART during Labor;

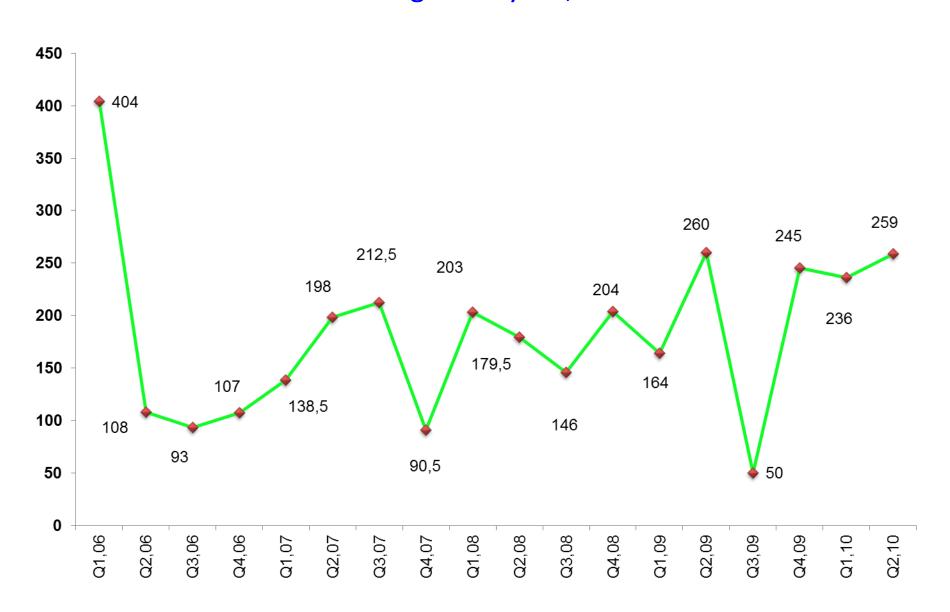

Denominator = Total Number of Women who Delivered with known HIV status +

Mean of CD4 at initial visit by quarter, in Maung Russey RH, BTB

Median of CD4 at initial visit by quarter, in Maung Russey RH, BTB

Percentage of patients who has CD4>350 (CD4<250 before April 2010) at initial visit by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Total number of initial visit patients with CD4> 250 by quarter <u>Denominator:</u> Total number of initial visit patients by quarter

Percentage of new TB Patients who were screened for HIV by quarter in Maung Russey RH, BTB

<u>Numerator:</u> Total number of new TB patient screened for HIV status at VCCT by quarter <u>Denominator:</u> Total number of new TB patient registered at TB ward by quarter

Percentage of patients newly registered at OI/ART who were screened for TB by quarter

<u>Numerator:</u> Total number of new OI patient screened for TB status by quarter <u>Denominator:</u> Total number of new patient registered at OI/ART site by quarter

The data is not complete and can not be used

However, doctors reported that all newly registered
 OI/ART patients received TB screening
